Rolomschrijving en taakafspraken

Een aanbieding zonder motivatie (dus waarom u de juiste kandidaat bent en hoe u matcht op de eisen die in de aanvraag staan) wordt niet in behandeling genomen.

As a Test Manager you will become a part of the delivery team for one of our key Customers in the Airspace Industry, dealing with Air Traffic Management, Flight planning and Air Traffic Control capacity planning. You will be managing testing department with over 40 people testing several tools an several frameworks.

In the Role of the Test Manager at Atos you will:

- Use the test management tools to manage test scenarios, script preparations, and perform test requirements analysis
- Manage the Site Acceptance Testing activities and coordinate User Acceptance Testing
- Create test plan and design test scenarios per the business requirement

- Be responsible for tracking all testing tasks, defects in an accurate and timely manner throughout the project life cycle and retest till closing.
- Prepare the test result report and provide walkthrough to project stakeholders.
- Proactively communicating test status, issues, and risk to project management with solutions proposals

Must have Skills (Demonstrable experience required):

- Excellent communication skills in English both verbal and written (English B2/C1 level required)
- REST/SOAP API testing with Rest Assured and ReadyAPI
- Understanding of Test Automation topics in Selenium, Java and Cypress, Javascript, Cucumber
- A minimum of 5 years of relevant testing experience to perform the advertised tasks
- Understanding and experience in Air Traffic Management system would be an asset
